DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 rejected under 35 U.S.C. 102(b) as being anticipated by Mischon (2055610).

Mischon (2055610) teaches the system as claimed including each yarn (12) feeding the needles being supplied through a related yarn guide (26) with a sensor (38) capable of detecting the flow/presence of the yarn itself and to cause the stop of the machine when the yarn guide is moved from the out of work position to the work position said sensor releases a signal with which is indicative of absence of flow of yarn to said yarn guide. Regarding claim 2, note the motor and the electric circuit with stops the machine.
